

SAMHAN co., LTD.
주식회사 삼한

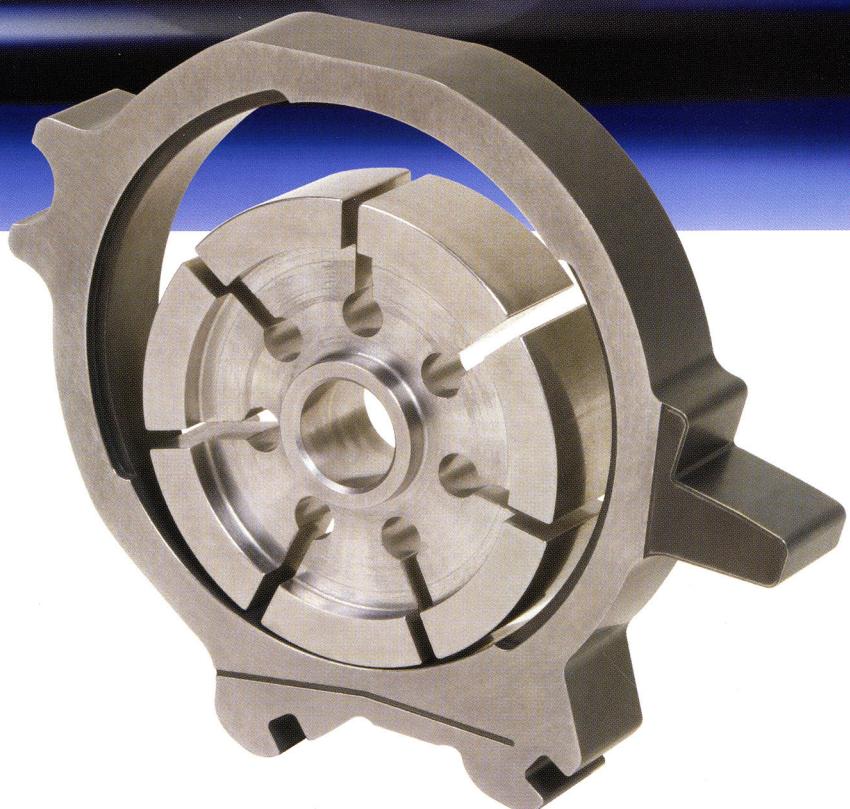

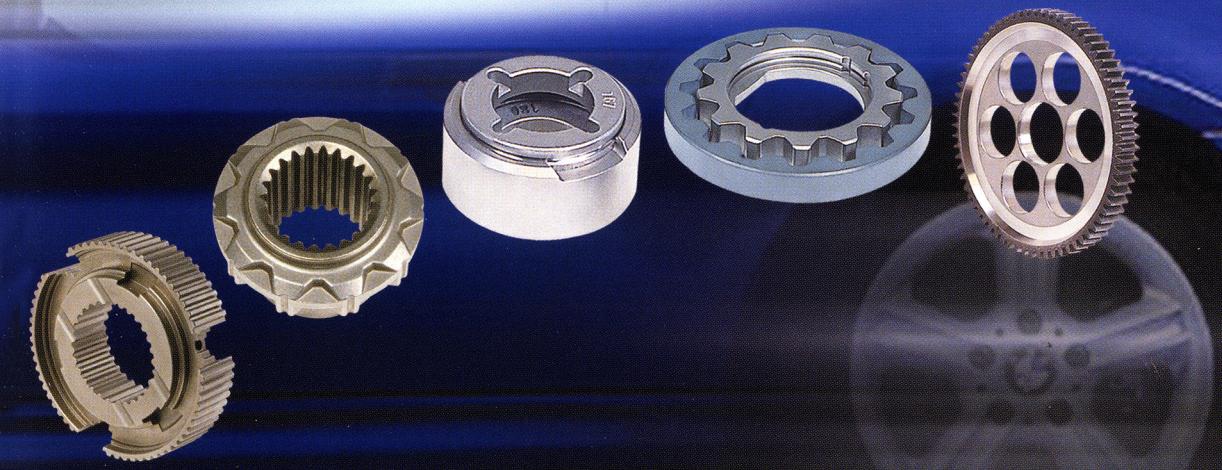

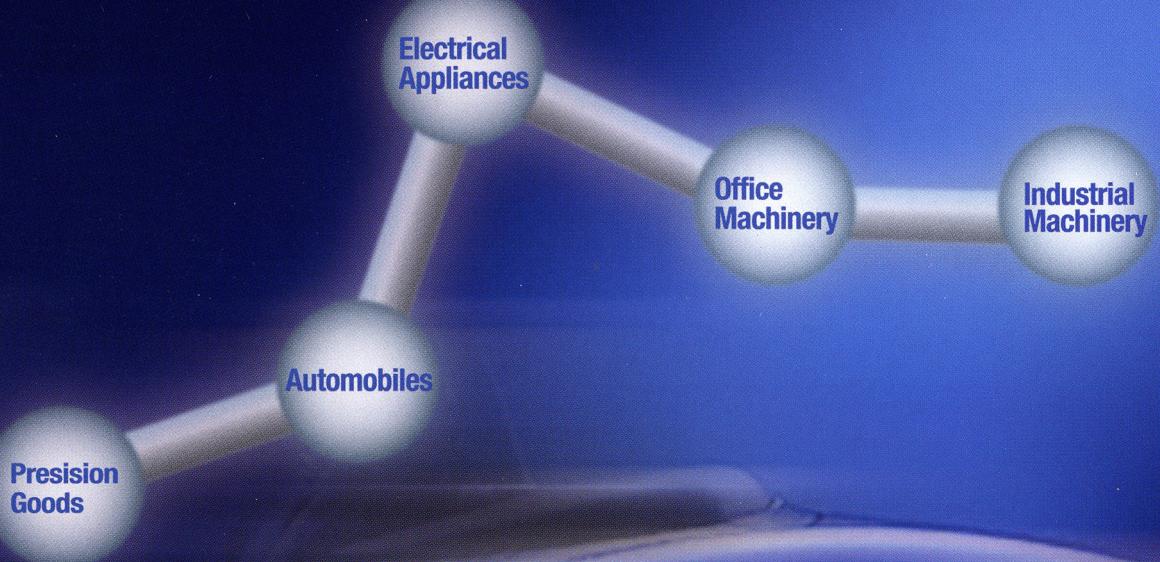

SAMHAN's Future, Making it With You!

삼한의 미래. 고객과 함께 만들어가겠습니다.

SAMHAN with its long experience and advanced technology manufactures parts for automobiles, electrical appliances, agricultural machinery, industrial equipment etc. To provide its clients with high quality Products at the most reasonable price, SAMHAN is constantly experimenting on ways to improve and develop new technology.

(주)삼한은 60여의 도입으로 고객만족을 경영의 최우선으로 하여 연구개발과 신기술에의 적극적인 투자로써 일반구조용 부품인 자동차, 전자, 농기계, 산업기계, OA기기 등에 가격경쟁력을 확보하고, 특수공법인 진공소결로, 고온소결로 등을 활용한 연자성부품, 내식, 내마모부품, Stainless계열, 고온내식성부품 등을 생산하고, 고객의 원가절감에 적극 기여하고 있습니다.

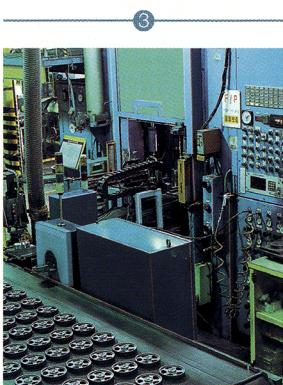

For High Performance, For Cost Reduction

Mixing/100kg~3ton Double Cone
Various types of powdered metal are combined in a designed ratio

Compacting/10ton~750ton Press

A controlled amount of mixed powder is automatically gravity fed into a precision die and is compacted usually at room temperature, at pressures 3~7ton/cm²

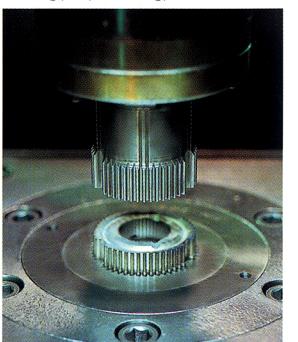

High temperature

Vacuum

Sizing(Repressing)

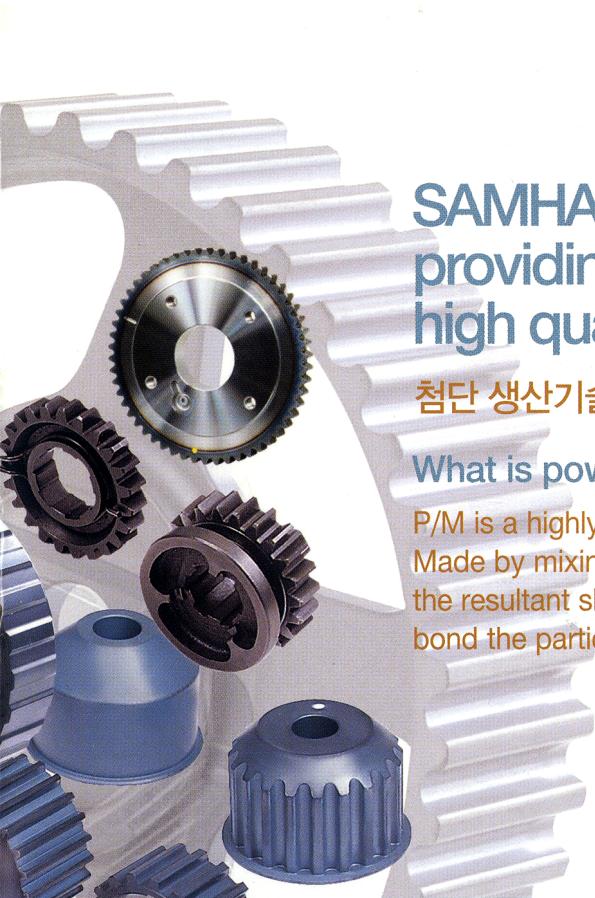

Atmosphere

Raw Materials

Sintering
compacted parts are heated below the melting point of the base metal, sintering transforms compacted mechanical bonds between the powder particles into metallurgical bonds(solid state), typical sintering temperature ranges are 1120~1200°C

SAMHAN guarantees customer satisfaction by providing cost-competitive products with high quality

첨단 생산기술과 풍부한 경험으로 삼한은 최고의 품질을 추구합니다.

What is powder metallurgy

P/M is a highly developed method of manufacturing precision metal parts. Made by mixing elemental or alloy powders and compacting the mixture in a die, the resultant shapes are then sintered or heated in a controlled-atmosphere furnace to bond the particles metallurgically.

5

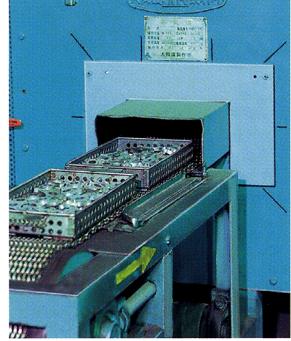

Machining(Turning)

Washing

Grinding

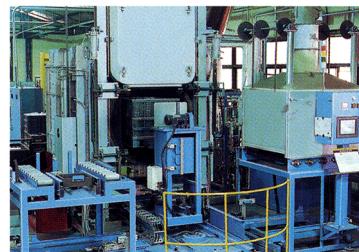

Drying

- Deburring

Secondary operation

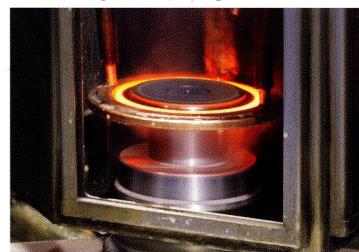

P/M parts are generally ready for use after sintering, however, to provide special properties, the parts can be repressed, impregnated, machined, tumbled, plated or heat-treated.

Steam treating

Quenching & tempering

High frequency

- Impregnation(Oil, Resin)
- Dacro
- Infiltration
- Shot Peening

⑥ Recharging die

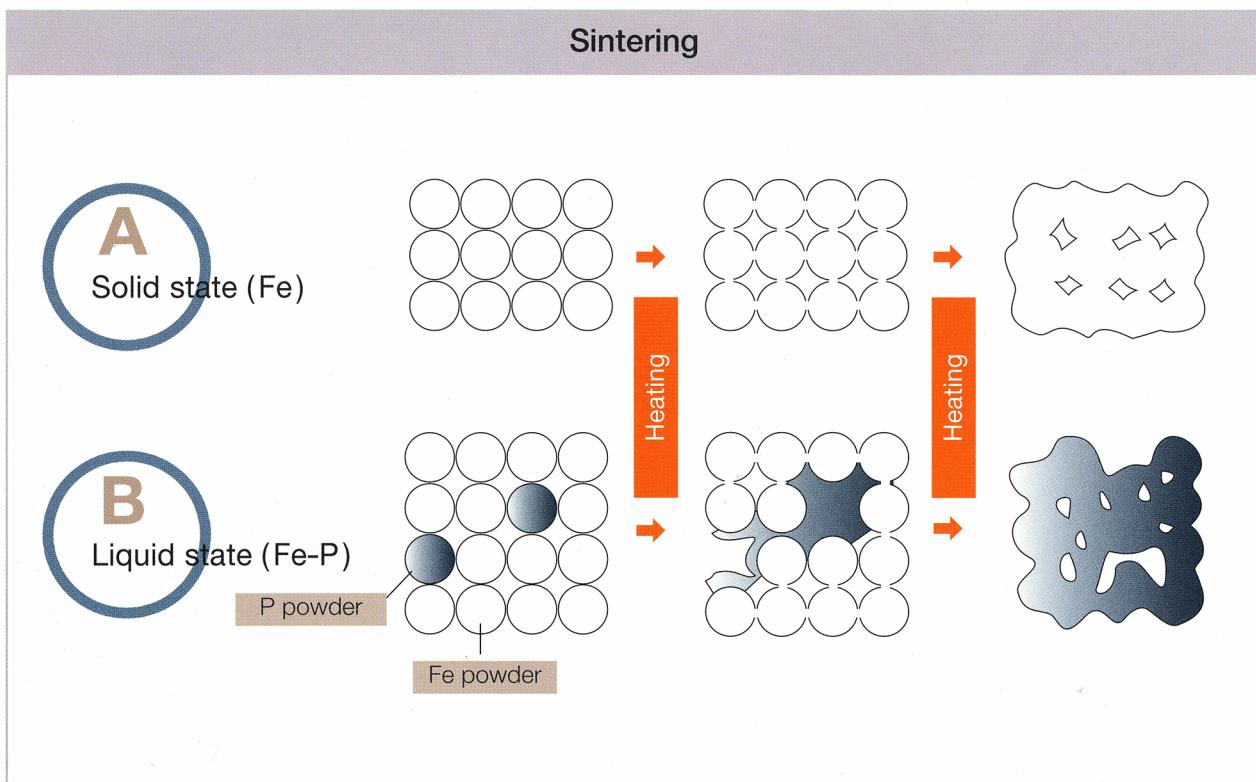

Advantages of the P/M process

- ① Suited to moderate-to high volume component production requirements.
- ② Facilitates manufacture of complex or unique shapes.
- ③ Provides materials which may be heat-treated for increased strength or increased wear resistance.
- ④ Produces good surface finishes.
- ⑤ Maintains close dimensional tolerances.
- ⑥ Permits a wide variety of alloy systems.
- ⑦ Eliminates or minimizes machining and scrap.
- ⑧ Provides controlled porosity for self-lubrication or filtration.
- ⑨ Cost reduction.
- ⑩ Conserves energy and materials.

SAMHAN, which has been pursued excellent quality confidence, has multistep perfect quality assurance system with new various inspection equipments and keeps on trying processing management to realize customer's satisfaction.

R&D Center

기술개발

SAMHAN guarantee the competitiveness and the quality for customers.
SAMHAN R&D CENTER will be with you all the time!

If you have interesting P/M parts,
Please let me know the following details.

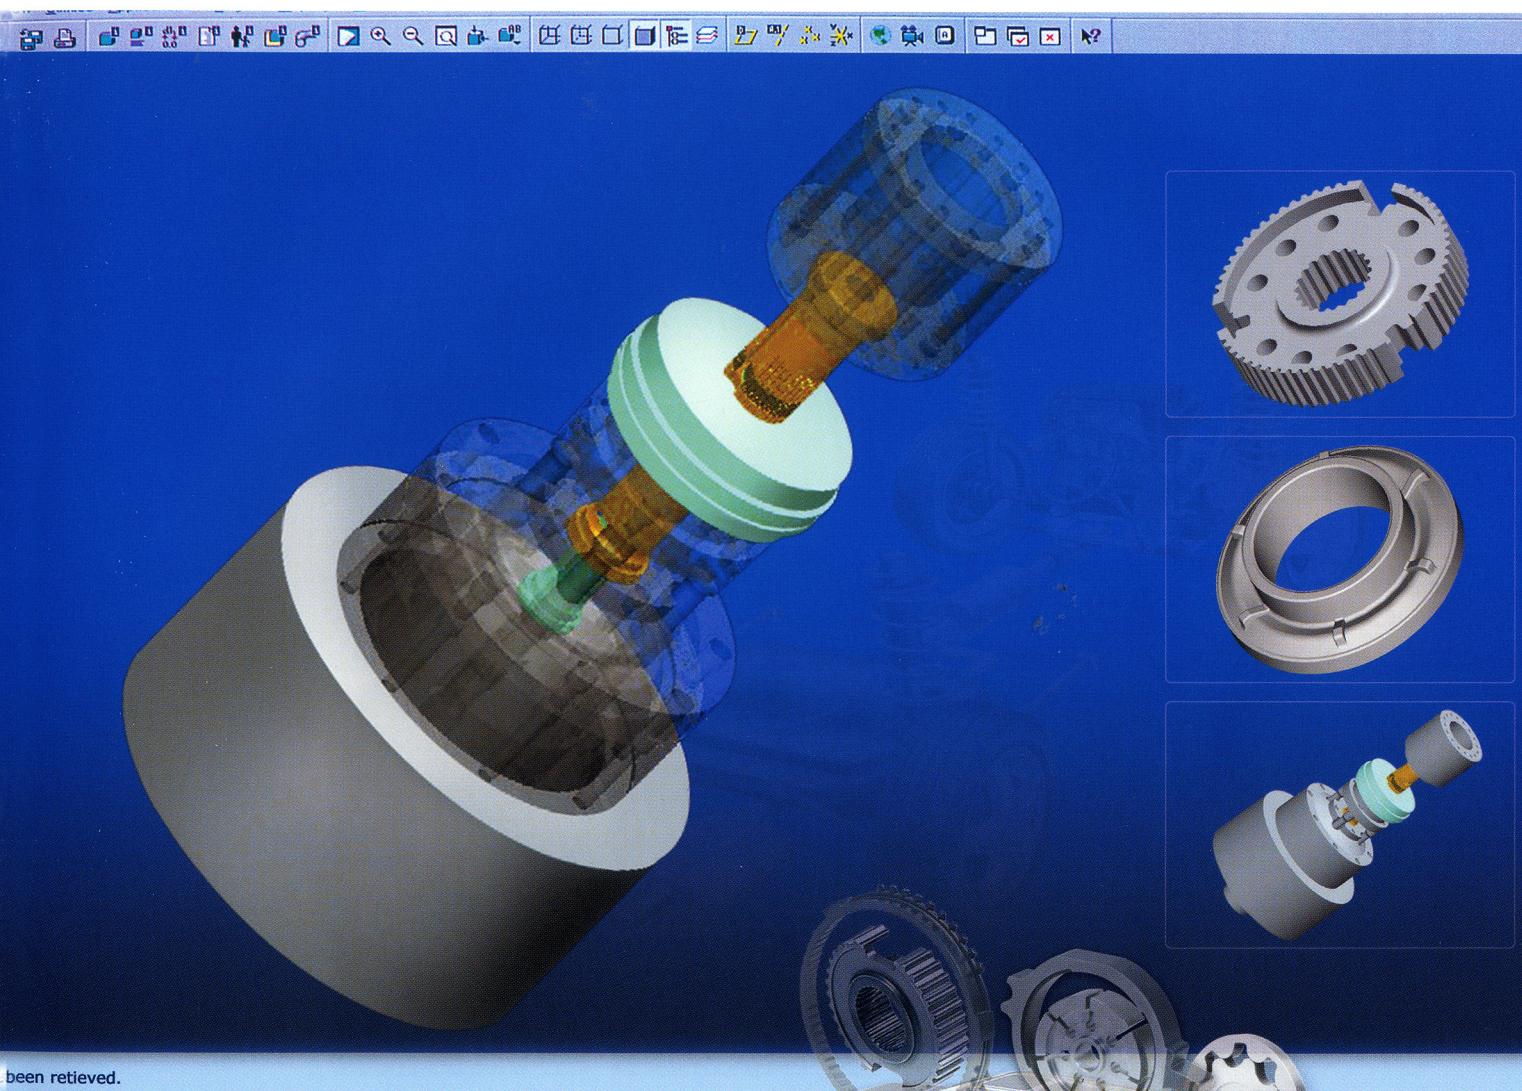

- Size, Shape & approximate weight
- Estimated annual purchase quantities
- What are the critical physical & mechanical properties
(Tensile strength, Fatigue strength, Magnetic, Corrosion resistance, etc.)
- What material or alloy system currently being used.

SAMHAN is always with you, do not hesitate contact us!

With the optimum 3D modeling design system, the creative and reasonable process planning, SAMHAN guarantee the best cost, the highest quality reliance, the delivery conformity that perfectly satisfying all costumer's needs.

고객과 함께하는 기술연구소! 상담을 주저하지 마십시오. 3D모델링에 의한 최적의 형상설계, 합리적이고 창조적인 공정설계를 통하여 여러분의 가격경쟁력을 향상시키고 목표설계에 의한 품질지수(6σ) 개선 및 개발일정 준수에 의한 고객만족을 여러분과 함께 합니다.

Company History

연혁

- 1975. 08. Samhan Co., Ltd. founded
- 1979. 10. Completion of the Changwon plant (began sintered product)
- 1983. 03. Affiliated with HMC for sintered automobile parts
- 1983. 08. Established corporate partnership with Mitsubishi Material Co., Ltd. (MMTL) for the production of sintered automobile parts
- 1994. 09. Established the R&D center
- 2003. 01. M&A with Korea Sintered Metal Co., Ltd. (KSM)
- 2003. 04. Established corporate partnership with Sumitomo Electric Industries Ltd. for the production of sintered automobile parts
- 2005. 12. Obtained ISO/TS16949

Based on respect for human life and our
customers the best products will be produced.

인간 존중과 고객우선을 바탕으로 최고의 제품을 생산하겠습니다.
